##### ■ UNICEF

###### [Narrowing the Gaps: The power of investing in the poorest children](#)

This report provides compelling new evidence that backs up an unconventional prediction UNICEF made in 2010: The higher cost of reaching the poorest children with life-saving, high-impact health interventions would be outweighed by greater results. This new study combines modelling and data from 51 countries. The results indicate that the number of lives saved by investing in the most deprived is almost twice as high as the number saved by equivalent investment in less deprived groups.

[Diversion Not Detention : A study on diversion and other alternative measures for children in conflict with the law in East Asia and the Pacific](#) The report aims to address bottlenecks in the implementation of diversion and other alternative measures related to juvenile justice. The study assesses the existing policies and practices in 12 countries in East Asia and 14 countries in the Pacific.

##### ■ UNFPA

[Annual Report 2016: Millions of lives transformed](#)  
[H6 Partnership Annual Report 2016](#)

##### ■ UN DESA: World Population Prospects 2017 <https://esa.un.org/unpd/wpp/>

The main results are presented in a series of Excel files displaying key demographic indicators for each development group, income group, region, subregion and country or area for selected periods or dates within 1950-2100.
